WORK EXPERIENCE

SOFTWARE ENGINEER - FRONTEND

Rocket Science Development, Montreal
Dec 2021 - now

As a Frontend & UI UX Developer:

- Translating the concept by building app wireframes and prototypes from defining colour palette, fonts, positioning and branding using Figma.
- Developing and building the entire frontend with React, connecting it to the backend and creating a whole full functioning app with UI & UX.
- Developing and maintaining the company's website.
- Designing and creating company marketing media campaigns and communication.

WEB DESIGNER

www.hijabtale.com, Mississauga
Feb 2020 - Dec 2021

- Built and designed the website using the Shopify platform selling 150+ SKUs within one month to fully run and generate high traffic (top 10% of the website established at the same week in Shopify after 6 months running).
- Created the website following the brand identity and segmentation achieving clean and sophisticated web design with better UI UX.
